Customer Reviews

This is a very short book that carries a high price tag. There are not many visual aids (which I actually like) to present data in a different form. The information is good.

Book arrived in record time in the condition it was advertised. Does not happen often when buying used books, so I was pleasantly surprised and thankful.

I thought it came in paperback, but it was actually just so used that the hard cover was completely off. I had to pay another \$15 to bind it so that it will last me the semester.

Why are there two ISBN numbers. I have 0130482870 ISBN number. I sure hope this is the right book. Looks like the same cover. I needed 9780130482877. Already started reading it. First two chapters are about types of business entities, third is a review of account statements. I prefer a smaller book with good information oppose to a large text with too much info.Despite the fact it may be the incorrect book, It arrived on time at the right price!Cheers!
