Customer Reviews

Great book....thanks for easing the anxiety of heading into the field, have done a zone deployment but waiting for that big one like everyone else, after reading this book, which by the way I read from front to back without putting it down! and taking in your many useful tips and years of knowledge I'm more excited than ever to get out there and ADJUST! I'd recommend this power house to anyone

interested in the field of adjusting.

This well written, fun to read and informative book offers a great value to the aspiring adjuster. Like any field one enters there is nomenclature, organization styles and traditions that dictate how one works professionally in that field ie. - 'When in Rome do as the Romans do'. Mr. Spurling has done a terrific job in presenting a good overview of adjusting life, day to day operations and provides excellent links to important industry sites, forums and tools used by the seasoned pro's. I'm happy to have found this book before I got too far along in the process as it is a true 'help guide' to further my career as a CAT adjuster. Thanks!

Thoroughly enjoyed this book!! It was informative and entertaining. Highly recommend this book to anyone looking to be an adjuster as well as those of us already in the industry. I'm certain I'll pick this one back up and read it again.

Extremely practical; extremely easy to read, and filled with undeniable testimony of how to approach this line of work without it running over you. Great ideas on how to keep your sanity in the midst of the insanity.

This was a very helpful book. It tell you what to expect and how to prepare. I fill I'm ready to take on the challenge of becoming an adjuster.

Informative and well written. If you're interested in the subject, this is the first place to start even before your license. You'll have a better idea of what you're getting into.

I am interested in learning who adjusters are. This book paints a good picture. I am a board member of an hoa. I want to understand how to deal with claims

This book gives good, basic information and is very easy to read and understand. I would recommend it to anyone new to the claims adjusting field!
