Phlebotomy Notes: Pocket Guide To Blood Collection (Davis's Notes)

Synopsis

A Davis's Notes book! This pocket-sized reference provides quick access to important phlebotomy information. Clinically focused, it's the perfect guide to collecting, transporting, and processing quality blood specimens for laboratory testing. The write-on/wipe-off pages feature a dedicated space where you can fill in the specific requirements for evacuated tubes, instrumentation, and analytical procedures for two different locations.

Customer Reviews

Good pictures for guides and lots of information at your finger tips. Small enough to fit in the cart in case of quick refresher. Bought to use along side a text book for classes but is great on its own as well.

My teacher recommended this to me for class and I loved using it during my internship! Very easy to use and has great little "tips" with easy to understand index, GREAT for tube colors!

It is a very useful notebook!!! I highly recommend it for Phlebotomy students and for Phlebotomists. I like that there is plenty of areas to write your own notes. I also like that if it gets wet, the liquid wipes right off. Very good buy!

This really came in handy. I love it. I am taking a MLT program where I have to take a phlebotomy clinical and it has everything that I need in it...

Love this book! While doing my externship this book was recommended to me. I am very glad that I ordered it. It includes labs and the corresponding tube colors which is something I needed. It is wipeable and will fit in the pocket of my scrubs. I have already recommended it to the other students who were in class with me.

I ordered this for my phlebotomy class and everyone in the class decided to order one too. This little pocket guide is perfect. It even includes things we did not learn in class. Nice size, sturdy material and arrived in one day with one day service. You can't go wrong with this guide.

I have finished trade school and passed my NCCT, this pocket size reference will be with me always. If not in my pocket, it will be in my back pack. Definitely worth the money and completely portable.

Perfect for studying on the fly with classmates. It was not required for my course, but it saved me from asking a lot of unnecessary questions in clinical. Now that I'm done with the course I use it to study while in the car waiting for traffic or whatever.
