It has finally arrived. The bible that everyone in the Salt Lake valley has been waiting for. No, it's not another religious doctrine. It is the guide to the diverse canyons of the Wasatch Range surrounding Salt Lake City, Utah. It's bigger and a whole lot better than the Ruckman's old guide. The guidebook covers all of the canyons that were in the previous guide, plus it covers new developments such as City Creek and Neffs Canyon. The Ruckmans follow the same format they used in their old guide, so don't expect many changes in that department. However, to say that this is only a revised edition is an understatement. The guide is twice as thick as previous editions and covers almost twice as many routes. It is a little bit more expensive, but it is worth it if you want to find the areas like the Shore Line Crag, Broads Fork and a plethora of new routes throughout the Wasatch. The only shortcoming of the guide is its short mention of the bouldering areas. The guide describes the locations of the bouldering areas but it does not describe any of the routes. This was probably done in order to save space and money but it would be nice for the Ruckmans to pass on some

bouldering beta. Overall impression, the guide is an excellent investment and a good excuse to replace your old torn up guide.

If you climb in the wasatch front and live in Salt Lake, you need this book. There are a few routes I have already climbed in Big Cottonwood that are not included in the book but for the most part, this guide is spot on.

This guide book is excellent: great beta, great charts. Only "problem" is that it only covers Salt Lake County--no AF Canyon.

Got into climbing last year and this book was a great guide to help me find the routes near my house. I would recommend this book to others because it has helped me.
