Solutions Manual For Actuarial Mathematics For Life Contingent Risks (International Series On Actuarial Science)

Synopsis

This must-have manual provides solutions to all exercises in Dickson, Hardy and Waters' Actuarial Mathematics for Life Contingent Risks, the groundbreaking text on the modern mathematics of life insurance that is the required reading for the SOA Exam MLC and also covers more or less the whole syllabus for the UK Subject CT5 exam. The more than 150 exercises are designed to teach skills in simulation and projection through computational practice, and the solutions are written to give insight as well as exam preparation. Companion spreadsheets are available for free download to show implementation of computational methods.

This solution manual is a must for the book! It took forever to find the write edition to match my book edition but this was it! All the pdf versions of the solution manual didnt line up completely with the problems in the text but this one did the trick! All the problems in the (even and odds) are available and well written

This is a must-have book for preparation of actuarial exam MLC. The solution manual explains the detailed solution for a lot of question in the SOA textbook Actuarial Mathematics. What a 5-star purchase from .

When you are studying for Actuarial Exams, you need someone that you can ask to explain

something, like an exercise. If you don't have access to such a person 24/7, a solutions manual is the next best thing.

I found this to be much cheaper than on-campus bookstores, purchased new for the same price as a rental on campus. Great explanations of problems found throughout the book

This is a good book it makes the material pretty understandable and is the best actuary textbook I have ran across.
