It doesn't matter how many personal development books you've already read. This one takes all of the most important concepts and lessons to unfold into one awesome read. It doesn't only give you great insight on how to make money, but in a way that you're also able to fulfill your passions! Direct and concise! Loved it!

This is an uplifting, positive guide with some pretty good ideas. The most important thing I took away from this book was the insight to combine the things you are good at with the things that you're naturally drawn to and satisfying. There is an example in the book about a person who would be well fitted for CNA work. Of course, that's the last thing I would ever think of when I think about finding my passion, but the break down does make sense for some people. That was the whole point. In this guide you kind of pick apart characteristics so you can better self actualize what it is that would make you happy, then taking the steps to pursue it. This is fairly fresh and useful advise for people who want to break it down.

Very helpful guide for persons who want to take steps to be more successful in life. The information will help persons to better understand themselves so that they can learn how to become successful as well as being able to help others achieve success. One of the most important things noted is that the book emphasizes that persons let their passion be their guide. This is very important to achieving success. Overall this is a great guide,

What an amazing book! I have been trying to find a book that could help guide me a little on what I am meant to do and while reading this I was starting to think of so many things I could be passionate about. I work at an office 13 hours a day, 5 days a week and I have been feeling

unmotivated with my life so I wanted to find a book with a few exercises to help me figure things out. I highly recommend this book to everyone!

What a lovely read! Interesting, well written, and definitely what I needed in a book about finding your passion. I think if anyone is ever confused about what they want to do in life then they would do well to get this book.5 Stars!
