# Deadly Medicines And Organised Crime: How Big Pharma Has Corrupted Healthcare

## Synopsis

PRESCRIPTION DRUGS ARE THE THIRD LEADING CAUSE OF DEATH AFTER HEART DISEASE AND CANCER. In his latest ground-breaking book, Peter C Gotzsche exposes the pharmaceutical industries and their charade of fraudulent behaviour, both in research and marketing where the morally repugnant disregard for human lives is the norm. He convincingly draws close comparisons with the tobacco conglomerates, revealing the extraordinary truth behind efforts to confuse and distract the public and their politicians. The book addresses, in evidence-based detail, an extraordinary system failure caused by widespread crime, corruption, bribery and impotent drug regulation in need of radical reforms. "The main reason we take so many drugs is that drug companies don't sell drugs, they sell lies about drugs. This is what makes drugs so different from anything else in life...Virtually everything we know about drugs is what the companies have chosen to tell us and our doctors...the reason patients trust their medicine is that they extrapolate the trust they have in their doctors into the medicines they prescribe. The patients don't realise that, although their doctors may know a lot about diseases and human physiology and psychology, they know very, very little about drugs that hasn't been carefully concocted and dressed up by the drug industry...If you don't think the system is out of control, please email me and explain why drugs are the third leading cause of death...If such a hugely lethal epidemic had been caused by a new bacterium or a virus, or even one-hundredth of it, we would have done everything we could to get it under control." FROM THE INTRODUCTION

## Book Information

Paperback: 322 pages

Publisher: CRC Press; 1 edition (August 28, 2013)

Language: English

ISBN-10: 1846198844

ISBN-13: 978-1846198847

Product Dimensions: 6.1 x 0.6 x 8.9 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)

Average Customer Review: 4.8 out of 5 stars [See all reviews](#) (61 customer reviews)

## Customer Reviews

One of the biggest canaries at the moment is Peter Gøtzsche, none other than the head of the Nordic Cochrane Centre, the Scandinavian arm of the Cochrane Collaboration, an independent research and information centre committed to preparing, maintaining, and disseminating reviews of the various treatments of mainstream medicine and examining whether they have adequate evidence of safety and effectiveness. Cochrane was the first group of individuals to champion the notion of 'evidence-based' medicine - that is, medicine shouldn't be used unless there's evidence that the stuff works. Gøtzsche is a guy after my own heart. When asked to speak at a Danish Society for Rheumatology event, called 'Collaboration with the drug industry. Is it THAT harmful?' Peter's opening gambit was to highlight the fact that Pfizer, one of the meeting's sponsors, had been fined \$2.3 billion in the US for promoting off-label use of four drugs, while Merck, the sponsor the year before, had been responsible for the deaths of thousands due to deceptive information about its arthritis drug. Gøtzsche's latest book, entitled *Deadly Medicines and Organised Crime: How Big Pharma has Corrupted Healthcare* (Radcliffe Publishing Ltd) pulls even fewer punches. The book essentially makes the point that the drugs industry uses virtually every tactic used by the mob to sell its products. He even quotes a former vice-president of Pfizer as saying, 'It is scary how many similarities there are between his industry and the mob. The mob makes obscene amounts of money, as does this industry. The side effects of organized crime are killings and deaths, and the side effects are the same in this industry. The mob bribes politicians and others, and so does the drug industry.'
